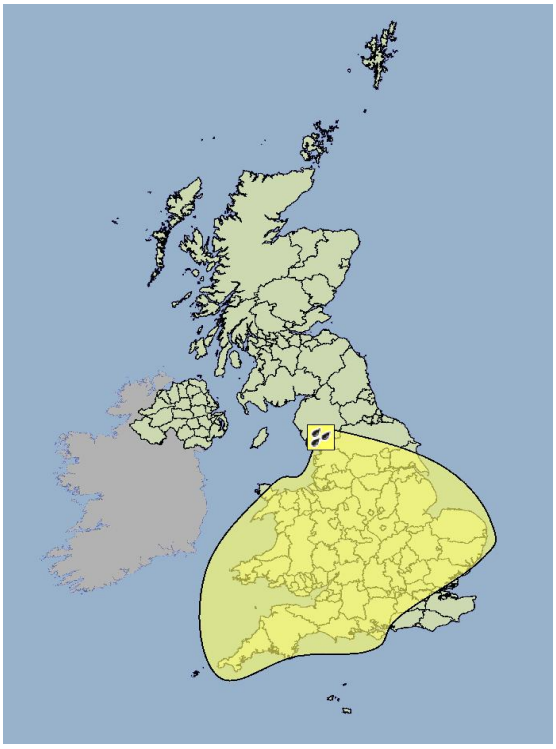
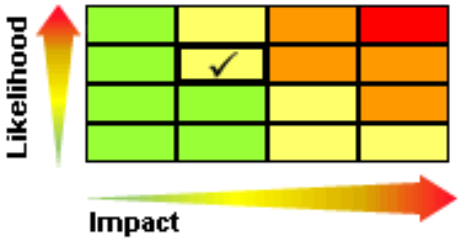
National Severe Weather Warning Service





Chief Forecasters Assessment
Rising temperatures will trigger slow-moving heavy showers and thunderstorms. Once again, 15-25 mm are likely to fall within an hour in scattered locations, with the risk of more than 30 mm, bringing the risk of flooding, especially if across urban areas.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **10:00 on Wed, 15th Jun 2016** until **21:00 on Wed, 15th Jun 2016**

Scattered heavy, thundery showers are expected to develop yet again on Wednesday, and will lead to slow-moving downpours. As on preceding days, some locations will miss these downpours, but please be aware of possible localised flooding and disruption to travel where they do occur.

This update extends the warning area eastwards over Yorkshire and Humberside.
